## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-35 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-10 is the inclusion of the limitation of one of the at least two parallel branches comprising a first inductance and another of the at least two parallel branches comprising a second inductance in series with a capacitor. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 11-25 is the inclusion of the limitation of the series connection of the second inductive element and the capacitive element is connected in parallel to the first inductive element. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 26-30 is the inclusion of the limitation of means for propagating signals from the input node of the single transmit path to the output node of the single transmit path at each of the plurality of different operating frequencies. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.
